

Black light Galaxy Painting

Summary:

- Students will create their own galaxy using acrylic and florescent paint on black fabric.
- Students will learn color theory from 3D perspective

Vocabulary: Florescent, Perspective, Negative space

What You Need

- Fabric black 3x5ft per student
- Florescent Tempura paint
- Acrylic paint
- Sponges
- Paint brushes
- Water cans
- Black lights

What You Do: {break this down into simple steps}

- Students will look at images of galaxies and discuss our galaxy, our place in the galaxy, stars, light years, solar systems, as well as the infinity of space.
- Students will design and create their own galaxy on black fabric using acrylic paint
- Students will use their hands, sponges, brushes to paint, splatter and experiment with ways of applying paint.
- Students will use florescent tempura to paint over their galaxies giving it 3 dimensions under a black light with 3D glasses.
